About me

I'm a programmer and entrepreneur from Argentina.

I want to dedicate my life to bringing ideas to life in the browser.

I want to work somewhere where I can keep improving my coding skills.

EXPERIENCE

I started my journey in 2019 working as a waiter in Spain.

I saved some money and I wanted to start a side hustle. I started almost 4 businesses and failed.

With the pandemic I saw an opportunity to sell computers and gaming accesories and I started FC Gaming, my current business.

I did everything from customer service to shipping and marketing.

In july of 2021 I was able to hire my brother and start doing what I always wanted to do: learning how to code.
